JOB OPENING

Job Title: Oracle ERP Architect

Duties and Responsibilities

The Oracle ERP Architect will work as part of a team to create a project design from start to finish that satisfies the business's needs, regulates its progress, abides by all financial budgets, code requirements and deadlines, and sees the project to completion. The Oracle ERP Architect will:

- Lead, and be knowledgeable in, hands-on implementation and solution design for Oracle E-business suite and Oracle Cloud technologies;

- Have an expert programming background in Oracle ecosystem and business process design;

- Provide best-fit architectural solutions for one or more projects;

- Assist in defining scope and sizing of work;

- Anchor Proof of Concept developments;

- Provide solution architecture for business problems and platform integration with third party services;

- Work with Product Owner/Business Analysts to understand functional requirements to architect, design, develop, test, and release features;

- Assist in prioritizing technical work with new business features;

- Create a balance between healthy systems and delivering critical business features;

- Contribute to, support, and encourage application development and integration best practices during the software development life cycle;

- Evaluate new technologies, features and functions and provide input on broader technology solutions outside of the employee's core discipline;

- Engage with business stakeholders to understand required capabilities;

- Integrate business knowledge with technical solutions; and

- Determine the most appropriate technical strategy and designs to meet business needs.

Nature of Work
Duration: Full Time, Permanent
Normal Work Days: Monday, Tuesday, Wednesday, Thursday, Friday,
Normal Work Shifts: First (Day)

Salary Range: $105,000 per year

Benefits: Health, Dental, Vision, Life, AD&D, 401(k), PTO

Number of Job Openings: 1
